

# Optimising the learning process

In the fast-paced world of electronic media, social networking is a phenomenon that has become a way of life, especially for the younger generation, with most communication channels being in English.

This is why it is important to develop good English language skills as early in life as possible in the areas of writing, reading, listening and speaking.

Cambridge English for Life (CEFL) provides high-quality, practical, vocational and professional English language training for children and adults.

It gives learners a firm grounding in the English language, which culminates in the Cambridge English Language Assessment Exams.

CEFL offers courses for both junior and secondary level learners at a range of different levels to optimise the learning process.

Junior English (JE) is offered at two

Cambridge English for Life (CEFL) helps develop children's English language skills through different levels of learning.

levels for pre-schoolers and Young Learners English (YLE) is mainly aimed at primary school learners, which leads to the Cambridge English Language Assessment YLE Exams, namely Starters, Movers and Flyers.

With emphasis on the four core language skills (listening, speaking, reading and writing), courses are conducted using meaningful and stimulating activities in a friendly environment.

At secondary level, courses are designed to teach and assess learners' command of English from elementary to advanced levels, covering all four language skills as well as grammar and vocabulary.

Each new learner takes an initial placement test upon registration to determine their current language ability. Upon completion of this test, they are placed in a class that matches their level as lessons are based on level rather than age for more effective learning.

All materials provided and used in the classroom are sourced from the United Kingdom. They are designed to ensure that students not only have high-quality material to refer to but also gain a broad, cultural, educational experience.

This enables them to have a clearer understanding of the uniqueness of meaning in the English language.
